EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Goldman on October 25, 2005.

The application has been amended as follows:

- In claim 52, line 2, delete "48" and insert --49--.

2. The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be an unobvious improvement over the cited prior art. The improvement comprises a video game apparatus and computer readable medium storing a game program to execute a game that enables the image viewpoint mode/scene image to be switched based on a player character's detected position and motion in the game, whereas, traditionally, different viewpoint modes are selected based on a player pressing a button or buttons on a game controller.

The closest prior art Takahashi et al. (WO97/36261) discloses an image processing method executed by a computer (video game) wherein the position of the viewpoint can be moved in real time in response to a positional relationship, which is constantly changing as the player controls the game, it is possible to achieve fine, stepless movement of the viewpoint, in contrast to conventional technology which provides only several types of viewpoint. By the change of screens accompanying this movement of the viewpoint, the player can view the game

from the optimum viewpoint at all times. For example, if the character is going up a slope, a viewpoint looking upwards is adopted so that a good view of the top of the slope is obtained, while if the character is leaping across a deep valley, by looking directly downwards, the width of the valley can be perceived readily. The viewpoint is moved automatically, requiring no operation by the player (other than controlling the game character); therefore, no extra burden is placed on the player (See whole document). Although, the viewpoint is moved in real time based on responses to a positional relationship of a player during the game, Takahashi et al. is silent to managing the viewpoint mode/scene image of the game as is similarly recited in independent claims 43, 47, 49, and 53.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott E. Jones whose telephone number is (571) 272-4438. The examiner can normally be reached on Monday - Friday, 8:30 A.M. - 5:00 P.M..
